Hiring Manager:

I highly recommend Zachary Branum for employment with your organization. Zach reported to me in the role of Automation Specialist at SemGroup from June of 2019 to March of 2020. In this role Zach provided tier 2 support, programming and development of WonderWare and PLCs as part of U.S. technical services. Prior to that he worked for me as I&E tech at SemGas, the natural gas gathering and processing division of SemGroup, where he was responsible for I&E support for a natural gas processing plants and compressor stations, including programming of VFDs, PLCs, and commissioning of new sites. Before that, Zach worked with me at GO Consulting Services from July 2008 until I left in March of 2012, where he was a project manager responsible for design and installation of security camera and access control systems.

For more than 7 years of my career I have trusted Zach to work through complex technical issues. He can be given a goal, and relied on to do the research, planning and labor necessary to address challenges and complete projects on time and on budget. I am confident that he could make meaningful contributions to your company.

Sincerely;

Chris Geer  
I&E Manager  
SemGroup
